About the Keynote Speaker

Sheila Duarte, DDS of Family 1st Dental, Onawa, will discuss how to “Love the Gums You're With - the connection to heart disease.” As a dentist, Dr. Duarte screens every patient every day. Because gum disease can play a role in heart disease, patients are screened for any periodontal issues, even sleep apnea, and treated as needed.

Dr. Duarte graduated from the University of Nebraska College of Dentistry. She was born in Norfolk, Nebraska and raised in the Tilden/Meadow Grove, Nebraska area. In her spare time, she enjoys boating, reading, listening to music (especially live music), and spending time with family and friends.

Over the years, many studies have found that people with gum disease are more likely to also have poor heart health, including heart attacks. Sticky bacterial plaque that builds up on your teeth causes inflammation to gums. Periodontal disease may increase inflammation throughout the body. Inflammation, in turn, may be an underlying problem in HEART DISEASE.

The perfect speaker for **Wear Red 2019!**
