

# Welcome to

# *the Healing Garden*

## at Burgess Health Center

*The shortest road to recovery passes through a healing garden.*

For a sick patient, the Healing Garden at Burgess Health Center is a temporary place of peace in the midst of dealing with illness and pain. Perhaps it will mean the difference between a bad day and a hopeful day.

The garden's tranquil setting, offers a healing retreat for patients, their families and visitors, hospital staff and the public. It provides a chance to be around nature and to escape, if for only a while, the stress and stimulation of a clinical environment.

Many unique opportunities for honoring the special people and occasions in our lives are offered in the garden. You can create a lasting memory by purchasing a garden feature such as a boulder, paver or landscaping opportunities brought forth by the expansion.
